ABSTRACT

Due to drop in production of Iron sheets in Insteel production company, the main purpose of this study is to determine the factors that are affecting the production of iron sheets in that company. The document also has the objectives of the study which are; to establish the extend to which workers in Insteel production company are trained, to find out the factors that are affecting the supply of raw materials in the company, to determine challenges facing the production of iron sheets in the company, to find out the measures that the company is putting in place to increase production of iron sheets in that company and also to establish the extend to which workers in that company are motivated. The data will be collected by the use of questionnaires, face to face interviewing and observation methods. After the data is collected, it will be analyzed to extract important facts. The data will be presented using descriptive statistics and tables.
