ABSTRACT

The study was set to establish the effects of leadership style on employee performance. The study was carried out at the headquarters of Teachers Service commission office in Nairobi. The study assessed all the leadership styles and relation to individual employee performance and organizational performance at large.

The research questions were formulated as per the objective of the study. The following was also identified: Significance of the study, scope of the study and the limitations as well. With the help of the various research questions elaborate details were given on how independent variables affect the dependent variables.
